

**FIELD OF USE:**

SUPER COCID is a successful trap for the catching and the monitoring of scale insects. The trap, with a roof shape, exploits the ascending way of flying, typical of scale insects. It is used with the specific pheromone and has proven to be successful for the catching of *Aonidiella aurantii*, *Planococcus citri*, *Pseudalacaspis pentagona*, *Comstockaspis perniciosus*.

HOW TO INSTALL:

The traps should be placed by using a plastic wire and must be parallel to the ground, in order to best perform. Usually, it is recommended to use 3-4 traps per hectare.

Packaging: 34 units/ box

Content:

- 3 sticky panels with a roof shape
- 3 pheromone dispensers
- 3 plastic wires
- 3 hooks to hang pheromones.
