

CHARACTERISTICS:

KAPPABIOS is a fertilizer with exclusive and original SERBIOS formulation; it derives from the processing of vegetable protein substances. **KAPPABIOS** contains a large number of amino acids, peptines, peptones, proteins, natural bio-activators, macro end trace elements which are absorbed and used by the plant, both by foliar and root system). The high Potassium content guarantees a fast and effective supply of this element, which implicates an increase in sugar content, a more intense color, a bigger and more uniform size of fruits. The presence of organic Nitrogen (gradually released) improves the vegetative growth of the plant. **KAPPABIOS** facilitates the plant development also under adverse conditions, such as saline or asphyxial soils, pest attacks or frost. It has an anti-stress function and facilitates the absorption of other fertilizers. When used in fertigation, it improves microflora activity in the soil. Thanks to its liquid formulation, **KAPPABIOS** is easy to use. It is allowed in organic farming.

INSTRUCTION FOR USE AND RATES:

FERTIGATION

Vegetables and flowers: 2-3 kg/1000 sqm, from post-transplantation, with regular applications every 15-20 days

Fruits and other crops: 20-30 kg/ha, divided into 2-3 applications after flowering

FOLIAR APPLICATION

250-300 g/100 lt

COMPOSITION	FORMULATION	CLASSIFICATION	PRE-HARVEST INTERVAL	PACKAGING
Organic Nitrogen (N) 3% Water soluble Potassium oxide (K ₂ O) 6% Organic Carbon (C) of biological origin 15%	Liquid			12 kg tank
