

CHARACTERISTICS:

TANNINO SERBIOS is a concentrate product, extracted with physical methods exclusively from Italian chestnut wood, without dyes or preservatives.

TANNINO SERBIOS stimulates the natural plant defenses activating resistance mechanisms towards several pathogens, bacteria, viruses, etc.

TANNINO SERBIOS is used with success in several agricultural contexts such as horticulture, fruit-growing, viticulture, ornamentals, etc.

FIELDS OF APPLICATION AND RATES:

TANNINO SERBIOS can be used on horticultural, fruit and ornamental crops.

TANNINO SERBIOS can be applied at all phenological stages but flowering stage.

Distribute evenly in order to reach the whole plant surface (foliage on both sides, fruits, etc.).

Rates: leaf treatment: 350-800 ml diluted in 100 lt of water.

In case of root or collar rot it is possible to apply the product at the base of the plant maintaining the same dilution.

If necessary, repeat the treatment 7-15 days apart.

In case of more sensitive plants, use the lower rate and operate in the shadow or during evening hours.

Precautions of use and warnings:

Store in the original packaging, in cool and dry place, away from excessive heat and light. Best within 24 months from production. Do not exceed the recommended rates. Before making mixtures with other products (plant protection products, fertilizers, etc.), carry out a small compatibility test. Store at temperatures between 5 and 40 °C.

Do not swallow. Avoid contact with eyes, skin, mouth.

WARNINGS:

The liability of the company is strictly limited to the composition, the formulation and the content.

The user shall be liable for any damage (lack of efficacy, overall toxicity, residues, etc.), caused by total or partial failure to comply with label instructions.
