

CHARACTERISTICS:

CRYPTOTEC is a product based on Straight Chain Lepidopteran pheromones (SCLP) for the fight against *Cryptoblabes gnidiella* (Honeydew moth) on grapevine, through mating disruption which consists in interfering with the olfactive communication mechanism between males and the females, causing a decrease in the mating and in the population of the pest in the field.

MODE OF USE

Place 300-400 dispensers/ha before the first generation flight begins, depending on the severity of the attack. Remove the dispensers from the packaging wearing a pair of gloves. Distribute chessboard-like, evenly in the vineyard, hanging the dispensers to the support wires. It is recommended to reinforce the plot borders. The dispenser duration is of 180 days. In order to assess the correct functioning, it is recommended to install 1-2 monitoring traps (e.g. Supertrack ala) and to carry out visual check on possible damages.

WARNINGS

Before use, store at a temperature of 5-6° C. At temperatures lower than -18°C, in its original packaging, the product is preserved for more than 2 years.

COMPOSITION	FORMULATION	CLASSIFICATION	PRE-HARVEST INTERVAL	PACKAGING
(Z)-11-hexadecenal, 165 mg/dispenser (Z)-11-octadecenal, 165 mg/dispenser Authorization of Ministry of Health: Under registration	Plastic dispensers	Warning 	Not needed	Bag of 200 dispensers
