

CHARACTERISTICS:

FLYPACK cerasi is a trap to be used in an "Attract & Kill" system for the control of *Rhagoletis cerasi*. The characteristics are similar to those described for CERATIPACK: the lure attractant is different, in this case specific for *Rhagoletis cerasi*.

SCOPE AND MODE OF ACTION:

FLYPACK cerasi is used for the control of *Rhagoletis cerasi* on cherry.

Place on the field right after flowering. Use 50-100 traps/ha (depending on the pressure of the pest), in the higher part of the plant and evenly distributed on the area. If the orchard borders with spontaneous vegetation or with abandoned orchards, it is recommended to reinforce the edges.

FLYPACK cerasi keeps its effectiveness for at least 150 days.

HANDLING AND STORAGE:

Store **FLYPACK cerasi** in cool and dry places.

The product is stable for 24 months in its original and sealed packaging.

COMPOSITION	FORMULATION	CLASSIFICATION	PRE-HARVEST INTERVAL	PACKAGING
g 0,015 of pure deltamethrin/trap Authorization of Ministry of Health: n° 17857 dated 05.10.2021	Ready-to-use trap	Warning 	Not applicable	5 ready-to-use traps 20 ready-to-use traps
