Zeolite Ground Serbios

Zeolite a base di clinoptinolite

CAMPI DI APPLICAZIONE E DOSI:

Treatments exclusively to the ground, with appropriate equipment for the distribution at a dose of 500-1000 kg/ha/year of product a second of the crop also with applications fractionated during the season. Repeat also in the successive 2-3 years to obtain a substrate of elevated exchange capacity and cationic.

For substrates of cultivation in pot use the dose of 1-3kg every 50-70lt of substrate.

CLASSE DIAMETRICA: 3 - 5 mm

AVVERTENZE:

The company limits its responsibility limited to the composition, formulation and content. The user is responsible for the damage due to the total or partial non-compliance of the instructions reported on the label.

AMMENDANTE

Zeolite a base di clinoptinolite

Percentuale di zeoliti naturali.....90 %

Zeolite prevalente: clinoptinolite

Capacità di scambio cationico misurata.....217 cmoli/kg

CONSENTITO IN AGRICOLTURA BIOLOGICA

Materie prime: zeoliti solo di origine naturale e non trattate nè arricchite chimicamente

Peso netto:
